**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Response to Amendment*

1. This action is in response to the amendment filed on 2/12/04. Claims 2 and 15-17 have been canceled and claims 1 and 3-14 are pending in the application.

### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1 and 3-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2, 4 and 6 of U.S. Patent No. 6157828 in view of Bolon (USP 5822420).

Regarding claims 1, 4, 6-8 and 11-12 of the present application, the subject matter recited by the present claims 1, 4, 6-8 and 11-12 are all encompassed by the claims 1, 2 and 4-6 of the USP '828, except for the message is generated based on a detection by the MSC of a condition which the mobile subscriber attempts to originate a call while another party is attempting to call the mobile subscriber. However, in the same field of endeavor, Bolon discloses a method and system for detecting the occurrence of condition whereby a mobile subscriber attempts to make a

Art Unit: 2665

call while another party is attempting to call the same mobile subscriber and generating a message signal at a switching center for transmitting to the mobile subscriber 32a via base station 26 (See Fig 3, col. 3, lines 3-15).

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to apply a signaling protocol as disclosed by Bolon for detecting the occurrence of condition whereby a mobile subscriber attempts to make a call while another party is attempting to call the same mobile subscriber and generating a message signal at a switching center for transmitting to the mobile subscriber via base station into Sauer's communication system. The motivation/suggestion would have been to notify the end points and correct the procedure for establishing a telephone call in a communication system.

Regarding claims 3, 5, 9-10 and 13-14, the present application and Bolon do not disclose service request message as call originated message and paging response message as a terminated message are well known and expected in the art. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to apply these messages into USP '828 and Bolon. The motivation/suggestion would have been to notify the end points and correct the procedure for establishing a telephone call in a communication system.
